Subject index

BIOMEDICAL APPLICATIONS

New technique for 3D artery modelling by noninvasive ultrasound. M.S. Nixon and T.K. Hames p86

CODES AND DECODING

3-D motion estimation of human head for model-based image coding. T. Fukuhara and T. Murakami p26
Analysis of an optical code division multiple access scheme employing Gold sequences. S. Benedetto and G. Olmo p211
Codeword synchronisation of CCMA scheme. J. Ni p425
Comparison of pitch prediction and adaptation algorithms in forward and backward adaptive CELP systems. H. Chen, W.C. Wong and C.C. Ko p240
Cryptanalysis of frequency domain analogue speech scramblers. B. Goldburg, S. Sridharan and E. Dawson p235
Efficient simulation of multilevel and coded transmission systems. S. Bellini and C. Molinari p365
Fast lattice-based gain-shape vector quantisation for image-sequence coding. D. Sampson and M. Ghanbari p56
Frame replenishment coding over noisy channels. L. Zhang, S. Panchanathan and M. Goldberg p144
High-speed Reed–Solomon decoder for correcting errors and erasures. C.-H. Wei, C.-C. Chen and G.-S. Liu p246
Maximum-likelihood decoding of array codes with trellis structure. B. Honary, L. Kaya, G.S. Markarian and M. Darnell p340
Multichannel adaptive forward error-correction system. M.A. Kousa and L.F. Turner p357
Multilevel sequences and line codes. L. Botha, H.C. Ferreira and I. Broere p255
New LSP encoding method based on two-dimensional linear prediction. C.-C. Kuo, F.-R. Jean and H.-C. Wang p415
New class of runlength-limited error-control codes with minimum distance 4. A. Popplewell and J.J. O'Reilly p104
New parity retransmission system using product codes. R.H. Deng p351
Predictive image coding using multiresolution multiplicative autoregressive models. S. Burgett and M. Das p127
Subcodebook searching algorithm for efficient VQ encoding of images. K.-T. Lo and W-K. Cham p327
Successive-erasure decoding of RS-coded MPSK schemes in a Rayleigh fading channel. S.H. Jamali and T. Le-Ngoc p152
System state-independent-unique-decodable CCMA codes. J. Ni and B. Honary p185
Theory and design of multidimensional QMF sub-band filters from 1-D filters and polynomials using transforms. I.A. Shah and A.A.C. Kalker p67
Time domain algorithms and architectures for Reed–Solomon decoding. S. Choomchuay and B. Arambepola p189
Trellis in-loop PARCOR coefficients quantiser for speech signals. K.W. Law and C.F. Chan p321
Two-level decoding of (32, 16, 8) quadratic residue code. J. Yuan, C.S. Chen and S. Ma p409
Type-II hybrid ARQ protocol using concatenated codes. G. Benelli and A. Garzelli p346
Windowed Huffman coding algorithm with size adaptation. H.-C. Huang and J.-L. Wu p109

COMMUNICATION SYSTEMS THEORY

Analysis of an optical code division multiple access scheme employing Gold sequences. S. Benedetto and G. Olmo p211
Blocking, hand-off and traffic performance for cellular communication systems with mixed platforms. S.S. Rappaport p389
CSMA/CD protocol for time-constrained communication on bus networks. R.-H. Jan and Y.-J. Yeh p197
Flow control methodology for virtual-circuit networks. S. Dey and P.K. Varshney p494
Multichannel adaptive forward error-correction system. M.A. Kousa and L.F. Turner p357
Multilayer perceptron based decision feedback equalisers for channels with intersymbol interference. M. Meyer and G. Pfeiffer p420
Type-II hybrid ARQ protocol using concatenated codes. G. Benelli and A. Garzelli p346
Waiting time probabilities in a statistical multiplexer with priorities. J.A. Schormans, E.M. Scharf and J.M. Pitts p301
Waveform division multiple-access. A.B. Sesay, P.C. Yip and K.M. Wong p176

COMPUTER SIMULATION

Using Weibull density function in importance sampling for digital communication system simulation. Y.-Y. Wang and C.-C. Lu p163

DIGITAL COMMUNICATION SYSTEMS

Effects of modulator deficiencies and amplifier nonlinearities on the phase accuracy of GMSK signalling. A.E. Jones, T.A.H. Wilkinson and J.G. Gardiner p157
Error control for low-bit-rate speech communication systems. S.A. Atungsiri, A.M. Kondoz and B.G. Evans p97
Estimating the impulse response of indoor radio channels using signal subspace techniques. T. Lo, J. Litva and H. Leung p203
HiMA: a hierarchical and modular ATM switch with partially shared output buffer. Z. Tsai, K. Yu and F. Lai p429
Multilayer perceptron based decision feedback equalisers for channels with intersymbol interference. M. Meyer and G. Pfeiffer p420
Multilevel sequences and line codes. L. Botha, H.C. Ferreira and I. Broere p255
Multipath fading effects on carrier recovery of BPSK signal in digital radio. G.-S. Liu and C.-H. Wei p381
Sample rejection and importance sampling in the simulation of multidimensional signalling systems. N.C. Beaulieu, E. Biglieri and M. Lai p445
Using Weibull density function in importance sampling for digital communication system simulation. Y.-Y. Wang and C.-C. Lu p163

FILTERS AND FILTERING

Optimal convolution filters and an algorithm for the detection of wide linear features. M. Petrou p331
Performance of output-modulator-structured linear almost periodically time-varying adaptive filter. H. Ding and M.M. Fahmy p114
Theory and design of multidimensional QMF sub-band filters from 1-D filters and polynomials using transforms. I.A. Shah and A.A.C. Kalker p67

IMAGE PROCESSING

3-D motion estimation of human head for model-based image coding. T. Fukuhara and T. Murakami p26
Adaptive filter for two-dimensional Gabor transformation and its implementation. A. Teuner and B.J. Hosticka p2
Classifying images using goal-seeking neural network architectures. A. de Carvalho, M.C. Fairhurst and D.L. Bisset p12
Distributed propagation of a-priori constraints in a Bayesian network of Markov random fields. C.S. Regazzoni, V. Murino and G. Vernazza p46
Fast lattice-based gain-shape vector quantisation for image-sequence coding. D. Sampson and M. Ghanbari p56
Frame replenishment coding over noisy channels. L. Zhang, S. Panchanathan and M. Goldberg p144
Image processing and its applications. M.C. Fairhurst p1
Neural model of Karhunen–Loéve transform with application to adaptive image compression. H.M. Abbas and M.M. Fahmy p135
Optimal convolution filters and an algorithm for the detection of wide linear features. M. Petrou p331
Predictive image coding using multiresolution multiplicative autoregressive models. S. Burgett and M. Das p127
Recognition of polyhedral objects using triangle pair features. K.C. Wong, Y. Cheng and J. Kittler p72
Signal-processing based method for acquiring very high resolution images with multiple cameras and its theoretical analysis. T. Komatsu, K. Aizawa, T. Igarashi and T. Saito p19
Skeletonisation as model-based feature detection. M.W. Wright and F. Fallside p7
Subcodebook searching algorithm for efficient VQ encoding of images. K.-T. Lo and W-K. Cham p327
Theory and design of multidimensional QMF sub-band filters from 1-D filters and polynomials using transforms. I.A. Shah and A.A.C. Kalker p67

INSTRUMENTATION AND MEASURING SCIENCE

Timing sensitivity of (MMSE) linear and DF equalisation for digital magnetic recording channels. S. Roy and S.A. Raghavan p169

MATHEMATICAL TECHNIQUES

Flow control methodology for virtual-circuit networks. S. Dey and P.K. Varshney p494
Optimal convolution filters and an algorithm for the detection of wide linear features. M. Petrou p331
Subcodebook searching algorithm for efficient VQ encoding of images. K.-T. Lo and W-K. Cham p327
Two-level decoding of (32, 16, 8) quadratic residue code. J. Yuan, C.S. Chen and S. Ma p409
Using Weibull density function in importance sampling for digital communication system simulation. Y.-Y. Wang and C.-C. Lu p163
Windowed Huffman coding algorithm with size adaptation. H.-C. Huang and J.-L. Wu p109

MODULATION

Effects of modulator deficiencies and amplifier nonlinearities on the phase accuracy of GMSK signalling. A.E. Jones, T.A.H. Wilkinson and J.G. Gardiner p157
Efficient simulation of multilevel and coded transmission systems. S. Bellini and C. Molinari p365
Error performance of coded SFH/DPSK in tone interference and AWGN. Q. Chen, Q. Wang, V.K. Bhargava and L.J. Mason p262
Performance evaluation of concatenated coding schemes on multilevel QAM signalling in non-Gaussian products environment. C.E. Dimakis, S.S. Kouris and S.K. Avramis p269
Phase distributions of Rayleigh faded signal with selection diversity reception. F. Adachi and T.T. Tjhung p308

NETWORKS

CSMA/CD protocol for time-constrained communication on bus networks. R.-H. Jan and Y.-J. Yeh p197
Classifying images using goal-seeking neural network architectures. A. de Carvalho, M.C. Fairhurst and D.L. Bisset p12
Flow control methodology for virtual-circuit networks. S. Dey and P.K. Varshney p494
HiMA: a hierarchical and modular ATM switch with partially shared output buffer. Z. Tsai, K. Yu and F. Lai p429
Multilayer perceptron based decision feedback equalisers for channels with intersymbol interference. M. Meyer and G. Pfeiffer p420
Performance analysis of a dynamic priority scheduling method in ATM networks. T.-Y. Huang and J.-L.C. Wu p285
Trans: a reliable broadcast protocol. P.M. Melliar-Smith and L.E. Moser p481

NOISE AND INTERFERENCE

Error performance of coded SFH/DPSK in tone interference and AWGN. Q. Chen, Q. Wang, V.K. Bhargava and L.J. Mason p262
Multichannel adaptive forward error-correction system. M.A. Kousa and L.F. Turner p357
Optimum memoryless bandpass nonlinearities. N.M. Blachman p436

OPTICAL SWITCHING

Optical TDM switching architectures with reduced control complexity. D.K. Hunter and D.G. Smith p220

OPTICS

Analysis of an optical code division multiple access scheme employing Gold sequences. S. Benedetto and G. Olmo p211

PICTURE PROCESSING AND PATTERN RECOGNITION

3-D motion estimation of human head for model-based image coding. T. Fukuhara and T. Murakami p26

Adaptive filter for two-dimensional Gabor transformation and its implementation. A. Teuner and B.J. Hosticka p2
Graph–theoretical approach to colour picture segmentation and contour classification. T. Vlachos and A.G. Constantinides p36
Image processing and its applications. M.C. Fairhurst p1
New technique for 3D artery modelling by noninvasive ultrasound. M.S. Nixon and T.K. Hames p86
Recognition of polyhedral objects using triangle pair features. K.C. Wong, Y. Cheng and J. Kittler p72

RADIO-WAVE PROPAGATION (MICROWAVE)

Modelling of radio transmissions into and within multistorey buildings at 900, 1800 and 2300 MHz. A.M.D. Turkmani and A.F. de Toledo p462

RADIOCOMMUNICATION

Comparison of pitch prediction and adaptation algorithms in forward and backward adaptive CELP systems. H. Chen, W.C. Wong and C.C. Ko p240
Effects of modulator deficiencies and amplifier nonlinearities on the phase accuracy of GMSK signalling. A.E. Jones, T.A.H. Wilkinson and J.G. Gardiner p157
Error performance of coded SFH/DPSK in tone interference and AWGN. Q. Chen, Q. Wang, V.K. Bhargava and L.J. Mason p262
Estimating the impulse response of indoor radio channels using signal subspace techniques. T. Lo, J. Litva and H. Leung p203
Header detection in a centralised packet radio system with common DS/BPSK spread-spectrum modulation. D.I. Kim p291
Modelling of radio transmissions into and within multistorey buildings at 900, 1800 and 2300 MHz. A.M.D. Turkmani and A.F. de Toledo p462
Multipath fading effects on carrier recovery of BPSK signal in digital radio. G.-S. Liu and C.-H. Wei p381
Multiple-capture performance of DS–SS packet radio systems with common spreading code. D.I. Kim p471
Optimum memoryless bandpass nonlinearities. N.M. Blachman p436
Phase distributions of Rayleigh faded signal with selection diversity reception. F. Adachi and T.T. Tjhung p308
Radio capacity of direct sequence code division multiple access mobile radio systems. A.O. Fapojuwo p402
Successive-erasure decoding of RS-coded MPSK schemes in a Rayleigh fading channel. S.H. Jamali and T. Le-Ngoc p152
Waveform division multiple-access. A.B. Sesay, P.C. Yip and K.M. Wong p176

SATELLITE LINKS AND SPACE COMMUNICATION

Packet reservation protocols for multichannel satellite networks. V.C.M. Leung p453
Performance evaluation of concatenated coding schemes on multilevel QAM signalling in non-Gaussian products environment. C.E. Dimakis, S.S. Kouris and S.K. Avramis p269

SIGNAL PROCESSING

Localisation and separation of simultaneous voices with two microphones. D. Banks p229
Optimum memoryless bandpass nonlinearities. N.M. Blachman p436

SIMULATION

Multiple-capture performance of DS–SS packet radio systems with common spreading code. D.I. Kim p471
Sample rejection and importance sampling in the simulation of multidimensional signalling systems. N.C. Beaulieu, E. Biglieri and M. Lai p445

SONICS AND ULTRASONICS

New technique for 3D artery modelling by noninvasive ultrasound. M.S. Nixon and T.K. Hames p86

SOUND BROADCASTING AND AUDIO

Timing sensitivity of (MMSE) linear and DF equalisation for digital magnetic recording channels. S. Roy and S.A. Raghavan p169

SPEECH SYNTHESIS

Comparison of pitch prediction and adaptation algorithms in forward and backward adaptive CELP systems. H. Chen, W.C. Wong and C.C. Ko p240
Cryptanalysis of frequency domain analogue speech scramblers. B. Goldburg, S. Sridharan and E. Dawson p235
Localisation and separation of simultaneous voices with two microphones. D. Banks p229
New LSP encoding method based on two-dimensional linear prediction. C.-C. Kuo, F.-R. Jean and H.-C. Wang p415
Orthogonal transformations of stacked feature vectors applied to HMM speech recognition. M.J. Flaherty and D.B. Roe p121
Speech modelling using cepstral-time feature matrices in hidden Markov models. S.V. Vaseghi, P.N. Conner and B.P. Milner p317
Trellis in-loop PARCOR coefficients quantiser for speech signals. K.W. Law and C.F. Chan p321

SWITCHES AND SWITCHING THEORY

Analysis of backpressure-type packet switches with input and output buffering. Y.C. Jung and C.K. Un p277
Efficient fast packet switch fabric with shared input buffers. E. Del Re and R. Fantacci p372
HiMA: a hierarchical and modular ATM switch with partially shared output buffer. Z. Tsai, K. Yu and F. Lai p429
Optical TDM switching architectures with reduced control complexity. D.K. Hunter and D.G. Smith p220

TELECOMMUNICATION

Efficient fast packet switch fabric with shared input buffers. E. Del Re and R. Fantacci p372

VERY LARGE SCALE INTEGRATION

Time domain algorithms and architectures for Reed–Solomon decoding. S. Choomchuay and B. Arambepola p189

VOICE COMMUNICATION

Error control for low-bit-rate speech communication systems. S.A. Atungsiri, A.M. Kondoz and B.G. Evans p97
